

Thanooj PelamKulangara

Full Stack Engineer - React | Node.js | PostgreSQL | MongoDB | AWS

+91 9846840046 | thanooj.pka@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile Summary

Full-Stack Engineer with 2.5 years of experience building and operating SaaS platforms in startup environments, including 0→1 product development and infrastructure ownership.

Experienced in developing scalable backend systems using Node.js, Express.js, PostgreSQL and MongoDB alongside frontend applications with React.js and Next.js.

Skilled in designing secure REST APIs, multi-tenant SaaS architectures, RBAC systems and real-time applications, with hands-on experience in AWS deployment, performance optimization and production operations.

Skills

Frontend	: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS.
State Management	: Redux Toolkit, Zustand, React Context.
Backend	: Node.js, Express.js, REST APIs, JWT Authentication, WebSockets, Redis.
Database	: PostgreSQL, MongoDB, MySQL.
Architecture & Practices	: Multi-tenant SaaS architecture, RBAC, RESTful systems, caching, performance optimization, clean architecture, SOLID principles, error handling.
DevOps & Deployment	: AWS EC2, Nginx, PM2, CI/CD workflows, Docker fundamentals, logging and monitoring.
Integration	: Stripe, Razorpay, Cloudinary, Firebase, Google OAuth, Socket.IO, Mapbox, Google Maps API, WhatsApp API.
Tools & Version Control	: Git, GitHub, Jira, Postman, Swagger, Figma.
Testing	: Jest, Supertest, React Testing Library, unit testing, integration testing, API testing.
Additional Exposure	: GCP, n8n, AI-assisted workflows, RAG fundamentals.

Work Experience

MedB Connected Care LLP

Full-Stack Engineer

January 2025 – Present

Remote - India

- Built and operated a **multi-tenant healthcare SaaS platform from 0→1 (MedB)**, owning backend systems, frontend applications and production infrastructure in an early-stage startup environment.
- Designed and developed **role-based React.js dashboards** for doctors, patients, clinics and administrators with subscription-aware user flows.
- Took ownership of system architecture, database design, authentication workflows and deployment processes within an early-stage startup environment.
- Architected scalable full-stack workflows using **React.js, Node.js and Express.js**, implementing subscription-aware RBAC across doctors, patients, clinics and administrators.
- Designed a hybrid persistence architecture using **PostgreSQL** for transactional consistency and **MongoDB** for audit logging and operational visibility, separating relational and high-volume workloads efficiently.
- Developed secure **REST APIs** with **JWT authentication and RBAC** supporting thousands of requests across 4+ user tiers.
- Implemented caching strategies and query optimizations, reducing API response latency by **35%** under load.
- Built real-time communication workflows using **WebSockets** with in-app, email and WhatsApp notifications across health-care operations.
- Optimized onboarding workflows, reducing new user setup time by **40%** for clinics, doctors and patients.
- Established centralized logging, monitoring and audit workflows to improve debugging efficiency and operational reliability.
- Managed production infrastructure on **AWS EC2** using **Nginx** and **PM2**, maintaining **>99% uptime** under live traffic.

Mcabee Technologies

Full Stack Developer

June 2024 – November 2024

Remote - India

- Developed and enhanced **React.js and Next.js modules** across public product pages and admin dashboards for a global social matchmaking platform.
- Contributed to backend services using **TypeScript, Node.js, Express.js and MongoDB**.
- Contributed to secure **REST APIs** with JWT authentication supporting web, Android and iOS clients.
- Implemented **Redis caching and Cloudflare CDN** integrations, reducing database load and improving system performance.
- Developed scheduled background jobs using **cron** to automate recurring workflows.
- Integrated **Firebase** for push notifications and real-time messaging.
- Supported production deployment and maintenance on **AWS EC2**, ensuring stable performance under live traffic.

Sixphrase by Veranda Learning

MERN Stack Trainer (Contract – 1 Week Program)

June, 2024

KCT, Coimbatore - India

- Delivered a 1-week intensive **MERN stack training program** to 50+ engineering students across multiple disciplines.
- Mentored students in designing and deploying full-stack applications using **React.js, Node.js, MongoDB, Express.js and JWT-based authentication**.
- Guided teams through end-to-end project architecture, debugging workflows and deployment best practices.
- Improved student project completion and deployment readiness within the program duration.

StepzFit - StepzFit Wellness

Freelance Full-Stack Developer

November 2023 - June 2024

Remote - India

- Designed and launched a **Progressive Web Application (PWA)** for personalized fitness and nutrition tracking with scalable, performance-oriented backend design.
- Developed the application using **React.js, Node.js and Express.js**, implementing secure **JWT authentication** and **Firebase OTP-based login**.
- Integrated **Stripe subscription billing** and **Google OAuth**, enabling secure payments and frictionless onboarding.
- Built real-time chat and activity updates using **WebSockets**, enhancing user interaction and responsiveness.
- Deployed and managed production infrastructure on **AWS EC2** with Nginx and PM2, ensuring stable runtime performance and environment configuration control.

Education

MERN Stack Development

Self-Taught

Kerala - India

2022 - 2023

Bachelor of Engineering in Mechanical Engineering

Ghousia College of Engineering (VTU)

Ramanagara, Karnataka - India

2010 - 2014
